

vista style & simplicity

At **Vista™**, we believe our railings create amazing spaces that inspire people to connect. Whether it is a backyard get together with friends, just the two of you sipping on a fresh cup of coffee on an early morning, or a birthday party for your children, our railings create the perfect space. Through design-forward thinking that embraces simplicity, our stylish railings can be enjoyed with every home.

We live everyday through our core values of safety, trust, integrity, respect and fairness and we are driven by our can-do attitude.

Our roots run deep... over four decades as an industry leader... yet we remain nimble on our feet, innovating, continually growing, continually learning and improving. From our origins in 1974 when wood was the raw material of choice, we were the first railing manufacturer in North America to be environmentally certified with the Forest Stewardship Council. As we have grown, evolved and innovated to provide our customers with the best railing solutions in the industry, we have also continued our commitment to environmental stewardship, with not only environmentally certified materials, but with recycling programs set up throughout our facility.

We design, engineer, test and manufacture premium quality railings in aluminum, glass, mixed materials and wood... all through the lens of style and simplicity. Yet we are more than our amazing products... we are the sum of our people. The best in the industry... passionate, innovative, creative, problem solving, driven professionals with a can-do attitude.

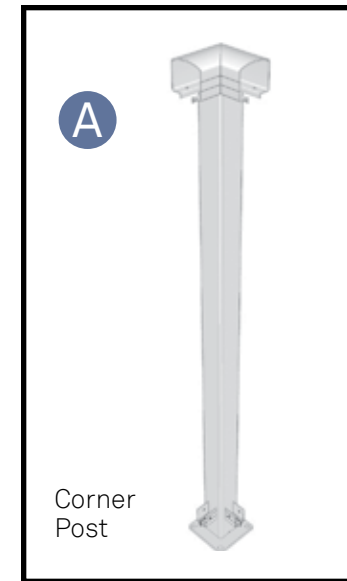

How do we describe our culture... we are customer focused, dedicated to continuous improvement; we have a sense of urgency; we are professional; we embrace change and maintain a sense of fun... **if you want amazing... try our railings.**
