Somerset Railing System

Somerset Railing System

1 Set newel posts (sold separately) to accommodate pre-drilled rail length. Center pre-drilled rail between newel posts and trim equal amounts from each end of top and bottom rails.

2 Slide Rail Hanger Bracket over the end of the rail and attach with screws through end of rail. (Hint: Opening of bracket must always be up)

3 With a high-quality polyurethane construction adhesive, fill all the holes half way. Insert balusters with adapters into pre-drilled holes in rail. This will bond the wood to the balusters.

4 Attach pre-drilled top rail, fasten railing section to post with hanger bracket, attach cap rail with high-quality construction adhesive.

EVERYTHING YOU NEED BETWEEN THE POSTS!

- ✓ 2 precision factory pre-drilled rails
- ✓ 1 cap rail
- ✓ Powder-coated balusters (square/straight)
- ✓ 30 level balusters to rail connectors
- ✓ 2 pair rail hanger brackets with fasteners
