Traditional Railing Kit System

Traditional Railing Kit System

1 Set newel posts (sold separately) to accommodate pre-drilled rail length. Center pre-drilled rail between newel posts and trim equal amounts from each end of top and bottom rails.

2 Slide rail hanger bracket over the end of the rail and attach with screws through end of rail (Hint: Opening of bracket must always be up).

3 With a high-quality polyurethane construction adhesive, fill all the holes half way. Insert balusters into pre-drilled holes in rail. This will bond the wood to the balusters. Best to use 26" baluster option for stairs.

4 Attach pre-drilled top rail, fasten railing section to post with rail hanger bracket, attach cap rail with high-quality construction adhesive.

EVERYTHING YOU NEED BETWEEN THE POSTS!

- ✔ 2 profiled & factory pre-drilled rails
- ✔ 1 profiled cap rail
- ✔ 2 pairs of rail hanger brackets with fasteners
- ✔ Powder-coated balusters (round/straight)

STAIR ANGLE ADAPTERS
Black 15 pack
AL9400B00W

RAIL HANGER BRACKET
Pack of 2 with fasteners
HW9509600W

Note: Check with the local building department as local building codes and bylaws may apply. Available in Premium Western Red Cedar. Level kits can be converted using the stair connectors accessory that change the baluster to rail connection to a 36-degree exterior stair. Posts also available for purchase in Premium Western Red Cedar. (posts not included in kit). Available in 42" and 36" railing height.
