## Tuscany Railing Kit System

Tuscany Railing Kit System

1 Set new posts to accommodate pre-drilled rail length. Center pre-drilled rail between newel posts and trim equal amounts from each end of top and bottom rail.

2 Slide rail hanger bracket over the end of the rail and attach with screws through end of rail.  
**Hint:** Opening of bracket must always be up.

3 Carefully thread the lock bar through slot in top portion of Tuscany balusters. With a high-quality polyurethane construction adhesive, fill all the holes half way. Insert balusters into pre-drilled holes in rail. This will bond the wood to the balusters.

4 Apply pre-drilled top rail. Fasten railing section to post with rail hanger brackets. Attach cap rail.

### EVERYTHING YOU NEED BETWEEN THE POSTS!

- ✔ 2 profiled & factory pre-drilled rails
- ✔ 1 profiled cap rail
- ✔ Powder-coated balusters (round/curved level or stair)
- ✔ Accent lock bar
- ✔ 2 pairs of rail hanger brackets with fasteners
- ✔ Stair kits include angle adapters (for baluster connection)
