To Whom It May Concern

Re: Vista Railing System Inc.  
Vista Aluminum Stair Railing System

Dear Madam/Sir:

Vista Aluminum Stair Railing System has been reviewed and evaluated and determined to be in compliance with the following requirements:

- 2015 National Building Code of Canada (NBC)
  - Section 9.8.8.2. Loads On Guards
  - Section 9.8.8.3. Height of Guards
  - Section 9.8.8.5. Openings in Guards
  - Section 9.8.8.6. Design of Guards to Not Facilitate Climbing
- 2012 Ontario Building Code (OBC)
  - Section 9.8.8.2. Loads On Guards
  - Section 9.8.8.3. Height of Guards
  - Section 9.8.8.5. Openings in Guards
  - Section 9.8.8.6. Design of Guards to Not Facilitate Climbing

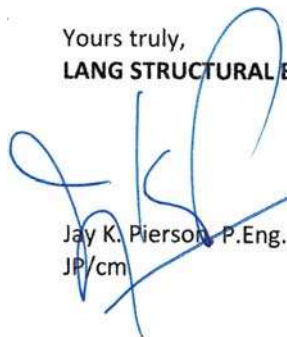

Identical requirements are provided in the 2012 British Columbia Building Code (BCBC) and these same requirements are applicable for the provinces of Alberta, Saskatchewan, and Manitoba.

Furthermore, all fastener connections represented on the Vista Aluminum Stair Railing System sealed drawings, dated July 13, 2017, are in compliance with the aforementioned building codes load requirements. For additional details for acceptable guardrail mounting configurations and layouts, refer to the 8th edition of the Vista Design Manual.

Contact us with any further questions concerning this.

Yours truly,  
**LANG STRUCTURAL ENGINEERING INC.**
