

## VISTA Horizontal Picket (STAIR) Infill Kit – Assembly Instructions

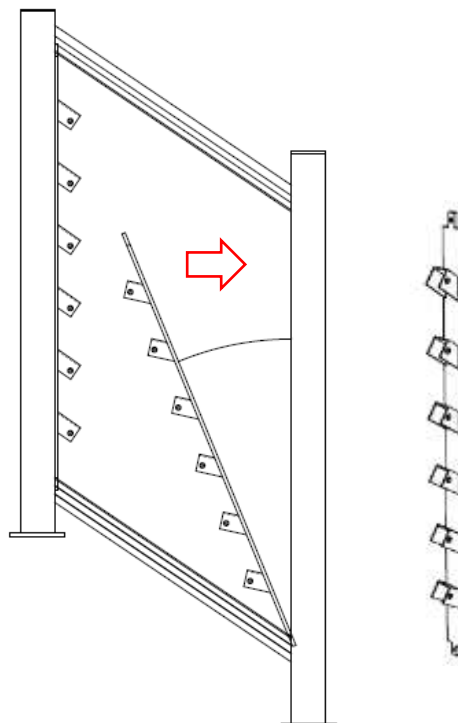

1. **Stair Posts and Rails:** Complete steps 1, 2, 4, & 5 of the Vista Residential Stair Railing Assembly Instructions (<https://www.vistarailings.com/wp-content/uploads/2023/08/Stair-Railing-Assembly-Instructions-English-V3.pdf>)
2. **Horizontal Picket Mounting Plate placement:** Take mounting plates and install tabs on top and bottom of the mounting plate into the open channel of the top and bottom rail, ensuring the opening on the mounting cup is facing down, the mounting cups on the top post should be pointed down towards the bottom post, and push the plate against the post.

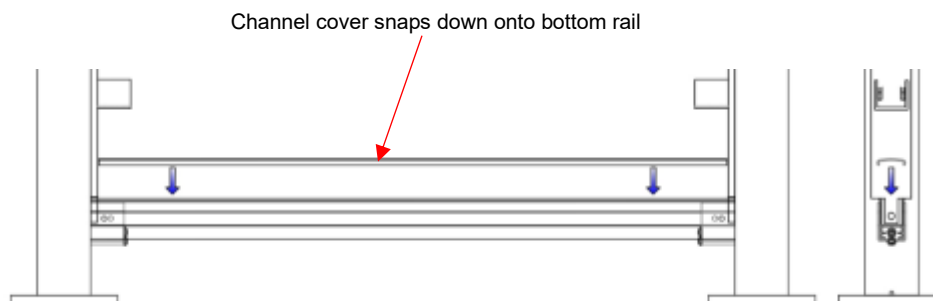

3. **Securing Horizontal Picket Mounting Plate:** Secure the mounting plate install in step 2 to the post by screwing thru the predrilled holes inside the picket bracket on the mounting plate using the provided #10 Flat Head self-taping screw.

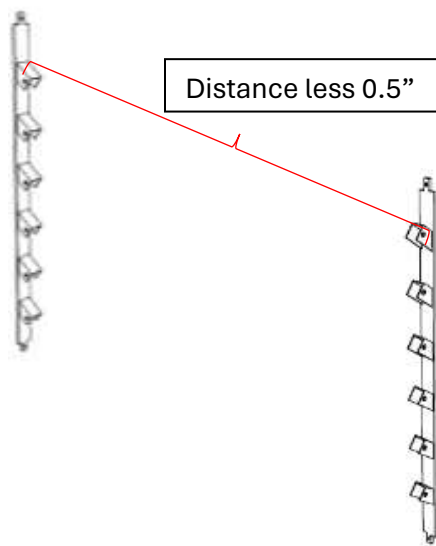

4. Repeat Steps 2 and 3 on the opposite side of the opening you are working on to secure a second mounting plate. Ensuring the opening on the mounting cup is facing down, the mounting cups on the bottom stair post should be pointed up towards the top stair post.

- Bottom Rail - Channel Cover Installation:** Using tape measure, measure the distance from mounting plate to mounting plate along the bottom rail and cut your channel cover to length and snap onto the bottom rail closing the channel. Repeat step using the top rail for measurements and installation.

- Horizontal Picket:** using tape measure, measure distance from inside of first mounting plate bracket on the bottom of the first post to inside of the first mounting plate on the second post and subtract 0.5" from distance and cut picket to length. Repeat this step for the remaining 5 bracket pairs.

- Horizontal picket:** Install 1<sup>st</sup> picket on the first mounting plate bracket at the bottom of the mounting plate by inserting it into the opening on the bottom of the bracket on both ends. Starting at the top post using the provided #10 Flat Head self-taping screw through the predrilled hole in the side of the mounting bracket screw the mounting bracket and picket securing the picket in place. Move down to the bottom stair post and secure the picket to the mounting plate with the provided screw as done at the top stair post. Repeat for the remaining 5 pickets and bracket pairs.
