

Stair Bracket PB7756 Installation Guide (Discontinued Product)

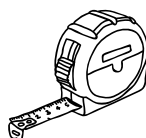

Tools required (not provided) / Outils requis (non fournis)

No. 2 Robertson
Screwdriver

Tournevis Robertson n° 2

Measuring Tape

Ruban a Mesurer

Important information

It is the responsibility of the installer to meet all code and safety requirements, and to obtain all required building permits. The railing installer should determine and implement appropriate installation techniques for each installation situation. VISTA Railing Systems Inc, its distributors and dealers shall not be held liable for improper or unsafe installations. VISTA Railing Systems posts must always be secured to the sub structure and should never be attached to only the surface material (ie deck board). Failure to follow all of these instructions could result in serious injury or death.

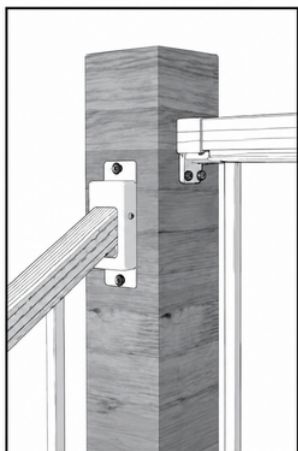

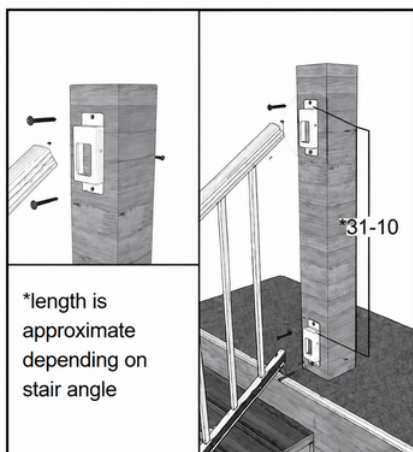

Informations importantes

Il incombe à l'installateur de respecter toutes les exigences en matière de codes et de sécurité, ainsi que d'obtenir tous les permis de construction requis. L'installateur du garde-corps doit déterminer et appliquer les techniques d'installation appropriées pour chaque situation. VISTA Railing Systems Inc., ses distributeurs et ses détaillants ne peuvent être tenus responsables d'installations incorrectes ou dangereuses. Les poteaux VISTA Railing Systems doivent toujours être fixés à la sous-structure et ne doivent jamais être attachés uniquement au matériau de surface (par exemple, la planche de terrasse). Le non-respect de toutes ces instructions peut entraîner des blessures graves ou la mort.

- 1** Determine the bracket location.
Position the stair railing against the existing post or column and mark the required bracket locations based on the stair angle.

- 2** Adjust the bracket length.
Measure and trim the bracket insert as required. The finished length will vary depending on the stair angle.

- 3** Attach the brackets. Secure the upper and lower stair brackets to the existing post or column using the supplied fasteners. Ensure both brackets are aligned with the stair railing.

- 4** Install the stair railing.
Position the top and bottom stair rails over the installed brackets.
- 5** Fasten the stair rails to the brackets using the supplied screws. Confirm that all fasteners are tight and that the stair railing is level, aligned and securely attached.
